### DETAILED ACTION

The amendment and TD filed 11/15/04 have been considered in preparing this Office action.

#### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claims 1-10 are rejected under 35 U.S.C. 102(e) as being anticipated by Olarig et al (6,167,476 hereinafter "Olarig").

As per claim 1, Olarig teaches a method comprising one or more graphics controller (Fig. 3A, 110 and col. 8, lines 1-3 and 12-21 and Fig. 16, 166s) receiving AGP transaction requests (col. 15, lines 13-16) at a first bus interface (Fig. 3A, AGP 107) from a core logic device (104); the graphics controller buffering the received AGP transaction requests using a request queue (col. 15, lines 1-22) coupled to the first bus interface; exchanging the AGP transaction requests using a second bus interface (such

as, AGP/AGP bridge 160) for access to the first bus interface between the core logic device and a graphics controller; arbitrating access to the first bus interface using a request arbiter (such as, Fig. 4A, 248) coupled to the second bus interface; and the graphics controller initiating a data transaction in response to the AGP transaction request (col. 15, lines 5-7). Therefore, at least claim 1 is anticipated by Olarig.

As per claims 2 and 3, Olarig further teaches a third bus interface and a fourth bus interface (see Figs. 4A, 4Ab, 4B, 4E and 4Eb; and col. 15, lines 1-22).

As per claim 4, Olarig teaches implementing a common, distributed arbitration mechanism using the request arbiter and a corresponding request arbiter of the core logic device (such as, within the AGP/AGP bridge 160 and core logic 104).

Claims 5-7 are similar in scope to claims 1-4, and thus are rejected under similar rationale.

Claims 8-10 are similar in scope to claims 1-4, and thus are rejected under similar rationale.

### ***Response to Arguments***

3. Applicant's arguments filed 11/15/04 have been fully considered but they are not persuasive.

Basically, Applicant argues that Olarig fails to teach "receiving AGP **transaction** requests ... from the core logic device" as recited in independent claims 1, 5 and 8. The examiner disagrees because the word "transaction" in the claims reads by the data transfer request of Olarig, for example, "when the core logic 104 requests the data, the master will have the data available".

***Conclusion***

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
